

Culture

Honest

The firm believes in "Human-oriented" and "Honest management", requires everyone to focus on all details of the daily works, today's work quality is the quality of life tomorrow.

Innovation

Innovation and Progress is a mission that we will always encourage and support. We will keep on making new designs to enhance our core technology.

Culture

Service

First quality, highest service, technology and development. With our sincere smile in exchange for customer satisfaction with our services.

Quality

Stringent and pragmatic is our constant work style, this attitude is rooted in our every working process. We believe the quality of product is the life of product, we won a lot of approval from our customers and industry professionals with this tenet for many years.

PVC Celuka Foam Board

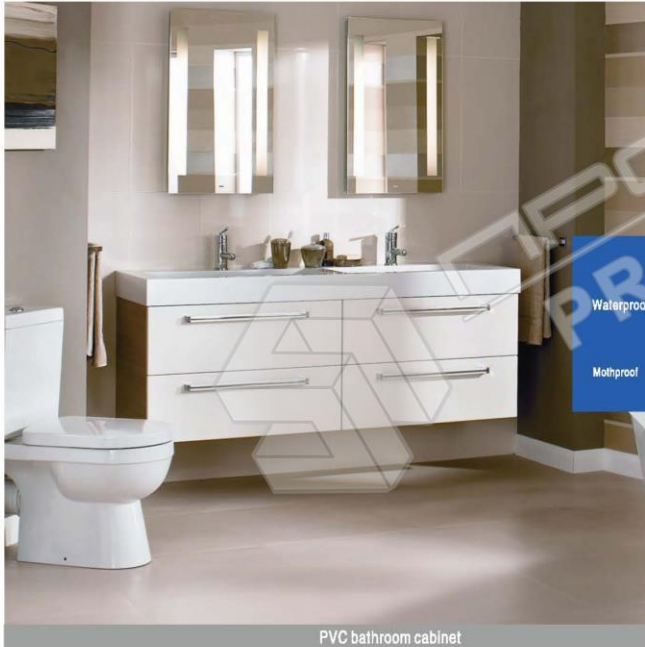

Product Introduction

Excellent Features;
No formaldehyde;
Strong and durable;
Light weight and easy to install;
Will not rot, warp, delaminate, cup or twist;
Resistant to weathering, shock and abrasion;
Salt water corrosion resistant;
Impervious to salts, insects and many chemicals,
including some acids;

Doesn't mold;
Can be worked just like wood;
Non-toxic;
100% recyclable;
Fire-retardant (self-extinguishing);
Easy to clean;
Virtually maintenance free;

PVC Expansion Sheet

Waterproof Fireproof
Mothproof Moistureproof

PVC Free Foam Board

Product Introduction

PVC free foam board flat plate surface, widely used in advertising display boards, mounting board, screen printing, carving etc..

Product Features

- PVC free foaming plate, with sound insulation, sound absorption and heat insulation performance.
- PVC free foam board has the properties of flame retardant, can self extinguish fire, can be used safely.
- PVC free foam board all series of products are the performance of damp proof, water absorption, and good shock proof effect.
- PVC free foam board using general wood processing tools can be construction.
- PVC free foam board can be like wood for drilling, sawing, nails, planing, bonding and other processing.
- PVC free foam board can be used for hot forming, heating bending and folding process.
- PVC free foaming board can be welded according to general welding procedure, and can also be bonded with other PVC materials.

PVC Expansion Sheet

Green environmental protection plate, with light, flame retardant, moisture, water, is the advertising signs, industrial packaging, crafts and other aspects of the necessary materials. By carving processing, can be used for sliding door, closet, closet decoration etc..

Laminated Board / Graining Board

Product Introduction

In order to better meet the needs of high-end customers, we also have Sanding machine, Laminate machine and Trigger squeeze to produce laminated board. We laminate WPC/PVC crust, foam board by PVC decorative film, HPL, aluminum sheet, PET film for customers to choose. Through some years of production and practice, our laminating technology and process have reached world-class level. Meanwhile, in order to facilitate customer choice, we also can provide laminating process service. We can laminate the board with any film offered by the client's own.

Coating pvc base material — PVC Foam sheets

PVC Board With Lamination And Graining Board For Decorations

WPC Construction Formwork

performance comparison	WPC	Bamboo ply	wood	steel
flame retardant	B2	No	No	Best
Recyclability	100%/recycleable	No	No	Yes
Water absorbing & deformation	No	easy	easy	rust deformation
Stripping process	easy	mid	mid	difficult
release agent	no need	need	need	need
special size	Yes	No	No	No
resistance to corrosion, acid & alkali	Excellent	poor	poor	poor
Surface treatment charge	0	0	0	0
times of reuse	≥ 30	10	6	30

PVC Expansion Sheet

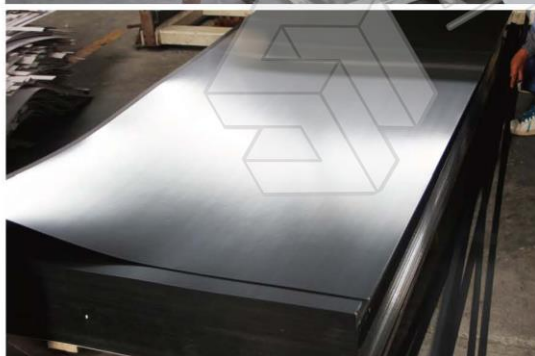

Advantage: light weight, easy sawing, planing, nailing, etc. It can be used together with steel, wood, bamboo, plywood construction formwork. It has high strength, hardness, good toughness, and recycled Reused more than 25 times and recyclable.

Production Workshop

Advanced production technology guarantee the product quality and performance. The products not only gather the epitomize of Europe and the United States and other advanced foreign technology companies, but also collect the essence in plastic industry. Our technology also tirelessly research and develop of new technologies, new processes, according to market requirements, and constantly optimize the production structure and performance.

Quality Test

- professional quality personnel.
 - 24 hours service.
 - accurate thickness, diagonal line measurement.
 - accurate weighing.
 - perfect combination of artificial and intelligent.
- This is our quality control system
